#### Testing Fabric Stretch Percentage

To test the stretch of your fabric, cut a piece of fabric 10cm wide (not including the selvedge). Stretch the fabric as far as it naturally wants to stretch, avoiding over stretching. If the fabric stretches to at least 10.5cm then it should be suitable.

## **Choosing a Size**

Two PDF patterns are provided with different size charts. The first is range 4-22 based on a B-cup block (a 2" difference between your High Bust and Full Bust).

The second is range 20-36 based on a D-cup block (a 4" difference between your High Bust and Full Bust). There is an overlap at sizes 20-22 where you can choose which size range you would like to use.

Clove is designed to be worn over another layer, and to pull over the head without fastenings. The B-Cup size range has a looser fit through the chest, with the split hem adding ease at the hips. The D-Cup size range includes a bust dart, and has a closer fit through the chest.

Measure your bust, waist and hips and compare against the 'Body Measurements' chart to select a size. We suggest selecting based on your bust size and grading between sizes as necessary at the waist. Please note, if you fall between sizes in the 'Body Measurements' chart it may not be necessary to grade up at the waist and hips, due to the loose fit of the pattern. The 'Finished Garment Measurements' will help to give a sense of how the finished garment will fit on your body, and if grading between sizes is required.
